NARROGIN
WIND FARM

Project Newsletter

OCTOBER 2026

Project overview

179 MW wind farm | 23 turbines on freehold land | 7km east of Williams, 10km west of Narrogin

Construction camp

The on-site construction camp for the Narrogin Wind Farm project has commenced operations, marking an important milestone for the Project. The first project personnel have now moved into the construction camp, enabling smoother coordination of on-site activities and reducing daily travel requirements for the workforce.

Cultural Awareness Training

Our second Cultural Awareness Training was held in October, with 15 participants. Facilitated by Annette Garlett and Gail Hill of Keipa Boodja Aboriginal Corporation, the session provided an engaging introduction to Aboriginal traditions, customs and values. Through interactive discussion, participants strengthened their cultural awareness, empathy and confidence in fostering an inclusive environment.

Construction Update

Construction is progressing steadily, with internal access roads taking shape and the on-site concrete batch plant being established to support concrete production for the Project. These activities are improving site accessibility for upcoming construction phases. Rectification works on a section of Clayton Road have been completed.

To access the Construction Booklet shared during the recent sessions, please scan the QR code with your phone or visit our website.
